PROFILE

Computer Science graduate (BSc, Nov 2025) with hands-on experience in web development and problem-solving. Skilled in **C++**, **React**, **Next.js**, **Tailwind CSS**, and **Python**, with a strong foundation in software engineering principles and collaborative teamwork. Passionate about building impactful software solutions and contributing to distributed, open-source driven teams.

EDUCATION

B.Sc. Computer Science

Ajayi Crowther University, Oyo, Nigeria

September 2021 – July 2025 (Expected Convocation: November 2025)

Relevant Coursework: Software Engineering, Web Development

EXPERIENCE & PROJECTS

IT Intern – YANOT Consultant Limited

Lagos, Nigeria • July–September 2023, July–September 2024

- Contributed to front-end and back-end development tasks, gaining practical experience in web app design.
- Applied cybersecurity fundamentals in project research and documentation.
 - Researched ideas for the capstone Access Control System project
 - Gained hands-on experience in a real-world client-facing project.

HephzibahZion Ventures (Personal Project)

2025 – Ongoing | React, TailwindCSS, GitHub Pages

- Developing a responsive e-commerce platform for small business sales and product display.
- Implemented product catalogue, cart, and checkout flow with intuitive design
- Hosted and deployed on GitHub Pages.

Access Control System (Final Year Project)

October 2024 – June 2025 | Python, Django, Hardware integration

- Designed and implemented a security-based project integrating hardware/software for controlled access.
- Focused on practical problem-solving and documentation in an academic setting.

Hackathon Project – GradMatch

May 2025 | Django, HTML, Tailwind CSS

- Built a platform to match students with graduate programs using AI-assisted workflows.
- Contributed to the frontend development and project presentation, collaborating in a cross-functional team.
- Collaborated in a 5-member team; pitched solution to panel of judges, receiving positive feedback for usability and innovation.

SKILLS

Programming Languages:

Python, C++, JavaScript, React, Next.js, Django, Tailwind CSS, HTML/CSS

Core Technical Skills:

Object-Oriented Programming (OOP), Data Structures & Algorithms, Memory Management, Multithreading, Debugging & Optimization, Operating Systems Fundamentals, Network Programming, Version Control (Git/GitHub), AI-Assisted Development, Basic Cybersecurity Awareness

Cloud & Tools:

Microsoft Azure Fundamentals (in progress), CI/CD, CMake, Google Test, Team Collaboration, Problem-Solving

LEADERSHIP & EXTRACURRICULAR ACTIVITIES

- **Assistant Class Rep**, Cybersecurity Bootcamp (2024) - Facilitated peer collaboration and knowledge sharing for 30+ boot camp participants.
- **Public Relations Officer (PRO)**, Clergy Children Fellowship, Oke-Osun Anglican Diocese - Coordinated communications, events, and teamwork across chapters.
